

Why Hypochlorous Acid is Safe and Highly Effective as a Hand, Skin and Surface Cleaner

There is unequivocal evidence that HOCl is much safer to use and, in some cases, much more effective than the popular sanitizers.

Popular Sanitizers like Clorox® and Lysol® contain poisons and are registered pesticides with the EPA.

Those popular surface sanitizers are not safe to use on human skin as they contain alcohols that are flammable and other chemicals that can be harmful for people and pets to breath, touch or ingest. DO YOU WANT YOUR LOVED ONES TO BE EXPOSED TO THEM UNNECESSARILY?

Hypochlorous Acid is organic and naturally derived. Containing only Electrolyzed Water, Salt and Vinegar!

The EPA's "List N" of products approved to treat Covid Includes many Hypochlorous Acid products. Many of the HOCl's on the list are at 200 ppm (FAC) or .2% so that level has been found effective for treating covid. There are also some at 460 ppm level that are approved for killing the nastiest bugs out there from C-Diff pores to Tuberculosis. This is the level that hospitals use.

Large Hospitals across the globe are generating Hypochlorous Acid Onsite.

Using the HOCl to sanitize everywhere from Operating Rooms to Patients rooms and also using as surface cleaners to eliminate the nasty dangerous fumes that popular products expose to the cleaning staff.

Toto, the largest manufacturer of toilets is now building Hypochlorous acid generators into their toilet seats.

These new "Washlet" toilet seats continually clean the toilet and deodorize odors AS it is being used. They call it EWater+, GOOGLE IT!

Hypochlorous acid is perfect for cleaning Hands, Skin and even EYES! Moisturizes and Soothes your hands and skin while cleaning, unlike those alcohol-based hand sanitizers but just as effective at cleaning!

As you can see by the products listed below from a quick search of Hypochlorous on Amazon, many of them are designed for eyes, skins and hands but some are also for surface cleaning.

Hypochlorous Acid (HOCl) can be found in a large number of products. A simple search for "Hypochlorous Acid" on amazon.com shows the popularity of this amazing solution!
